

## AGENDA    REGULAR STRATA COUNCIL MEETING

The Owners Strata Plan VIS 5801      2020, June 2 at 10:00 hours Unit 8

**Participants:** Treasurer 21; Chair 17; Maintenance Officer 27; Secretary 5 (recorder);  
Vice Chair/Bylaws 8; Landscape Officer 13; Waste Water Management Rep (WWMR) 20

**A. Call to Order 10:01 by Chair**

**B. Approval of Agenda**

**MOTION:** (Maintenance) to adopt the agenda of Strata Council Meeting of June 2, 2020 as circulated with the following additions under unfinished business: the submission of the RV report and RDN tree removal; under new business: change of directors.

**SECONDED:** (Vice Chair/Bylaw)

**CARRIED:** 7 of 7

**C. Approval of Minutes**

**MOTION:** (Treasurer) to adopt the minutes of Strata Council Meetings held May 7, 2020 as circulated.

**SECONDED:** (Landscaping)

**CARRIED:** 7 of 7

**D. Acceptance of Reports**

**MOTION:** (Maintenance) to receive reports from Council Members as circulated.

**SECONDED:** (Vice Chair/ Bylaws)

**CARRIED:** 7 of 7

**E. Unfinished business arising from the minutes of past meetings.**

1. **(Treasurer) Budget:** Treasurer has requested that budget submissions from council members be submitted by June 15, 2020.

2. **(Secretary) Ratification of motions that were passed via email during the Covid19 pandemic** (as per Civil Resolution Tribunal (CRT) Mueller v. The Owners, Strata Plan LMS2195 2018 BCCRT 773 decision):

**MOTION:** (Maintenance) To ratify the following three motions previously passed via Email.

**SECONDED:** (Treasurer)

**CARRIED:** 7 of 7

**MOTION:** Unit #29. To remove the current, partially dead, juniper hedge between strata units 29 and 30 and replace with Portuguese Laurel or Pink Princess Escallonia.

**MOVED:** (Secretary) To approve Unit #29 Request and Undertaking,

**SECONDED:** (Treasurer)

**CARRIED:** 7 of 7

MOTION: Unit #3. To plant fire resistant Rhododendrons to replace dead and dying cedars and junipers and a damaged jasmine.

MOVED: (Treasurer) To approve Unit #3 Request and Undertaking:

SECONDED: (Secretary)

CARRIED: 7 of 7

MOTION: Unit #13. To remove the Blue Spruce tree in their front yard due to its poor condition and replace it with grass.

MOVED: (Secretary) To approve Unit #13 Request and Undertaking

SECONDED: (Treasurer)

CARRIED: 7 of 7

3. **(Secretary) Unit 25 Indemnity and Alteration Agreement.** The removal of 14 feet of hedge and replace with fence complying with fire safety guidelines and addition of a paving stone patio. It was noted that this is the first fence to be built using the new fire safety guidelines.

**MOTION:** (Maintenance) To accept Unit 25 Indemnity and alteration agreement as submitted and agreed upon via email.

**SECONDED:** (Landscaping)

**CARRIED:** 7 of 7

4. **(Secretary) AGM:** The Legion Hall in Bowser has been booked for the AGM on August 26, 2020. The secretary will contact the Legion to change the booking time to 5:30 through 9:00 pm and request the supply of the required equipment. Arrangements are being made for an insurance agent to come prior to the AGM at 6:15 pm for 30 minutes to give a presentation and answer questions from interested parties concerning condo insurance. The doors will be open for the AGM at 6:45 with the meeting to begin at 7:00 pm. Of course, all of this is subject to regulations regarding Covid 19.

5. **(Landscaping) Watering of both sides of Entranceway lawns:** After an in-depth discussion concerning the condition of the entranceway grass and future costs relating to it and the lateral drain fields, it was agreed to request the agreement of the Waste Water Management Committee to commence a trial period of watering the grass on either side of the entrance driveway.

**MOTION:** (Vice Chair/Bylaws Officer) Contingent upon positive feedback from Waste Water Management Committee, once the rainy season is over we will to proceed to water the lawns covering the lateral drain fields on either side of the entrance way driveway during the dry season for 15 minutes once a week. Inspection holes of A and C will also be monitored once a week.

**SECONDED:** (Chair)

**CARRIED:** 7 of 7

6. **(Maintenance) Painting of Phase 2:** The painter should be starting around June 15th or so.
7. **(Maintenance) Streetlight across from Unit #9:** The streetlight was moved back from the road.
8. **(Maintenance) Depreciation report inspection will be on June 26th at 2:00 PM:** Technicians from Pacific Rim Appraisals will inspect both attic and crawlspaces in three units of differing styles. Maintenance will check with Pacific Rim as they had mentioned they may want to look at a fourth unit.
9. **RV Report:** Investigation into RV Parking improvements is on going and cost estimates are being collected. Currently some of the RV users and those on the waiting list are reviewing the current layout of the existing RV Parking Area with the hopes of reorganizing the area to fit more RVs without expansion. There are still 4 units on the current waiting list and several more who have expressed interest in obtaining access to RV parking.
10. **(Landscaping) RDN:** Still awaiting a reply from RDN about the covenant and the removal of trees.

#### F. New Business

1. **Chair) Verbal complaint regarding stray cats:** Upon reviewing the Bylaws, we found that there is nothing in the Bylaws for us to enforce.
2. **(Vice Chair/Bylaws) Notice to owners to check for gas fireplace vent clearance from bushes:** A notice will be sent out to all owners to check the location of their gas fireplace vents and if required to please trim back any vegetation.
3. **(Vice Chair/Bylaws) Trespass event:** A follow up email will be sent to residents, by Bylaws, concerning an unpleasant incident that happened at the pond.
4. **(Vice Chair/Bylaws) Call for Bylaws change proposals for consideration in preparation for the AGM:** Any suggestions by owners or council for changes to the Bylaws please submit to Bylaws at [vicechair@vis5801.ca](mailto:vicechair@vis5801.ca) by June 30, 2020.
5. **(Secretary) Limiting the number of people attending the AGM so that we can maintain physical distancing and be under the allowed gathering limit of 50 people:** The issue was discussed and it was decided that we wait and see what develops as we get closer to the AGM.
6. **(Landscaping) Temporary replacement for Ron LaRoy:** Landscaping will canvass the community for a resident to do the sprinkler system while Ron is off for 10 to 12 weeks.
7. **(Chair) Change of Directors for Bank:** The treasurer will contact the bank to confirm that they are using the current LLE directors list that was submitted to them by the treasurer after last year's AGM.

Council would like to thank Unit #22 for cutting the lawn area around the pond and the RV Parking area.

**G. Date, Time and Location of the next meeting will be at the call of the Chair.**

**H. Adjourn 12:40**

Original Signed:

Larry Highcock, Chair

Tannis McKinnon Charest, Secretary

Lighthouse Landing Estates VIS5801  
Strata Council Reports,  
May 31, 2020

**Chair**

- Nothing to report

**Vice Chair**

- Two owners have come forward indicating their interest to be on the LLE Green Team: Jane Rothmund Unit #27 and Jo Ann Walker Johnston Unit #29.

We will work collaboratively to compile a list of ideas for owners and Council to consider.

**Secretary**

- Unit 29 has found a surveyor (after the job being refused by 3 previous surveyors) to come and survey the changes to Unit 29 LCP (Limited Common Property). The surveyor stated he would come and do the job within 3 months of contact.
- The following of items were presented by Shawn Smith of Cleveland Doan LLP in a webinar hosted by VISOA (Vancouver Island Strata Owners Association).

If there are any further issues with Covid 19 we may want to consider one of the following options suggested for AGMs.

In person (our current method)

Limited or restricted proxy

Electronic (virtual) meeting

Hybrid meetings

Waiver and approval

Another item brought up at the webinar is the holding of a regular council meeting by electronic means as outlined in Section 17 of the Bylaw act

Bylaw 17 (2)

“At the option of the council, council meetings may be held by electronic means, so long as all council members and other participants can communicate with each other.”

Email is not a method expressly permitted by Bylaw 17 (although decisions by email have been upheld by the court and the CRT). We may wish to amend this section in our Bylaws as currently these decisions must be ratified at the next meeting.

**Treasurer**

- Nothing to report

**Maintenance**

- Continue working on a Maintenance schedule/calendar.

**Landscape**

- Nothing to report.

### **Waste Water Management**

- Report on routine maintenance.  
Having some false alarms from high level circulation tank issues.  
Replaced 1 only high level float in tank.  
Will be replacing wooden structure float supports that are ageing probably next week.
- No problems with unit operations.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |  |  |  |  |  |  |  |  |  |                 |                 |                                      | Include Criteria on CofA: No

<sup>(1)</sup> Test Location: BV Labs Vancouver (Biochemical Oxygen Demand, Total Suspended Solids (NFR))

### Sample Inspection Observations & Comments

**# of Samples Received:** 1  
**Details:** 2) Temperature > 10 C  
Sample(s) collected same day and received at an average temperature of 18°C with no cooling media.  
**Average Temperature:** Package 1: 18.0 °C

### Additional Notes

- Unless special storage arrangements are made, all samples will be disposed 60 days after receipt. Additional fees may be applied for extended storage.
- Additional fees may be applied for the disposal of hazardous samples.
